

Julissa Zavala

Product Designer II | New York, NY | hello@julissazavala.com | julissazavala.com

About

Product Designer specializing in translating complex datasets into clear, actionable interfaces for users making high-stakes decisions. 5 years building data-rich dashboards, reporting tools, and operational workflows in B2B environments where information clarity directly impacts outcomes for diverse user bases.

Skills

Design: Data Visualization · User Research & Testing · Complex Workflow Design · Design Systems · End-to-End Product Design · Information Architecture · Interaction Design

Tools: Figma · Adobe Creative Suite · Miro · Mixpanel · Jira · Lovable · Cursor · Storybook · HTML/CSS

Collaboration: Cross-Functional Collaboration · Stakeholder Management · Stakeholder Presentations · Design Reviews · Design Mentorship

Experience

Product Designer II

New York, NY

New Visions for Public Schools

Dec 2024 - Dec 2025

- **Reduced student assessment time by 60% for 200K+ educators** by designing overview panel that synthesizes critical indicators from 4 data domains into one scannable view, replacing workflow requiring 5-10 minutes across multiple panels
- **Drove 150% increase in engagement and 28% growth in active users** by designing information architecture that surfaces actionable insights from complex datasets, replacing workflow requiring **5-10 minutes per assessment**
- **Designed AI-powered conversational interface** for the data grid, allowing **200k+ educators** to query data in natural language and dynamically surface relevant columns — shipped before departure

New Visions for Public Schools

Aug 2021 - Dec 2024

- **Prevented platform abandonment** by designing saved view system that stopped **10,000+ users** from migrating to static spreadsheets, growing adoption from **15% to 55%** and reducing feature abandonment from **60% to 20%**
- **Built and scaled design system from scratch** with **100+ components** adopted across **6 product teams**, reducing design-to-development handoff time by **40%**
- **Cut support volume by 80%** by designing workflows that eliminated session timeout friction, allowing users to maintain productivity with real-time data instead of exported snapshots
- **Architected and designed a content management system** for shelter staff to navigate hundreds of NYC resources across housing, mental health, and food services — enabling quick retrieval of organizations, contact information, and eligibility criteria for time-pressured caseworkers

Education

Tufts University

Bachelor of Arts | Child Study and Human Development

Minor in Studio Art, focus on Graphic Design
